

STUDENT CONTRIBUTIONS FOR UNIVERSITY MAGAZINE COLLECTION SYSTEM

THE PROBLEMS

Collecting student contributions for university magazines with the standard method of using papers can be a complicated and tiring process.

Not Centralized

With many different faculties, students will spend a lot of time traversing between the faculty buildings.

Limited Collection Time

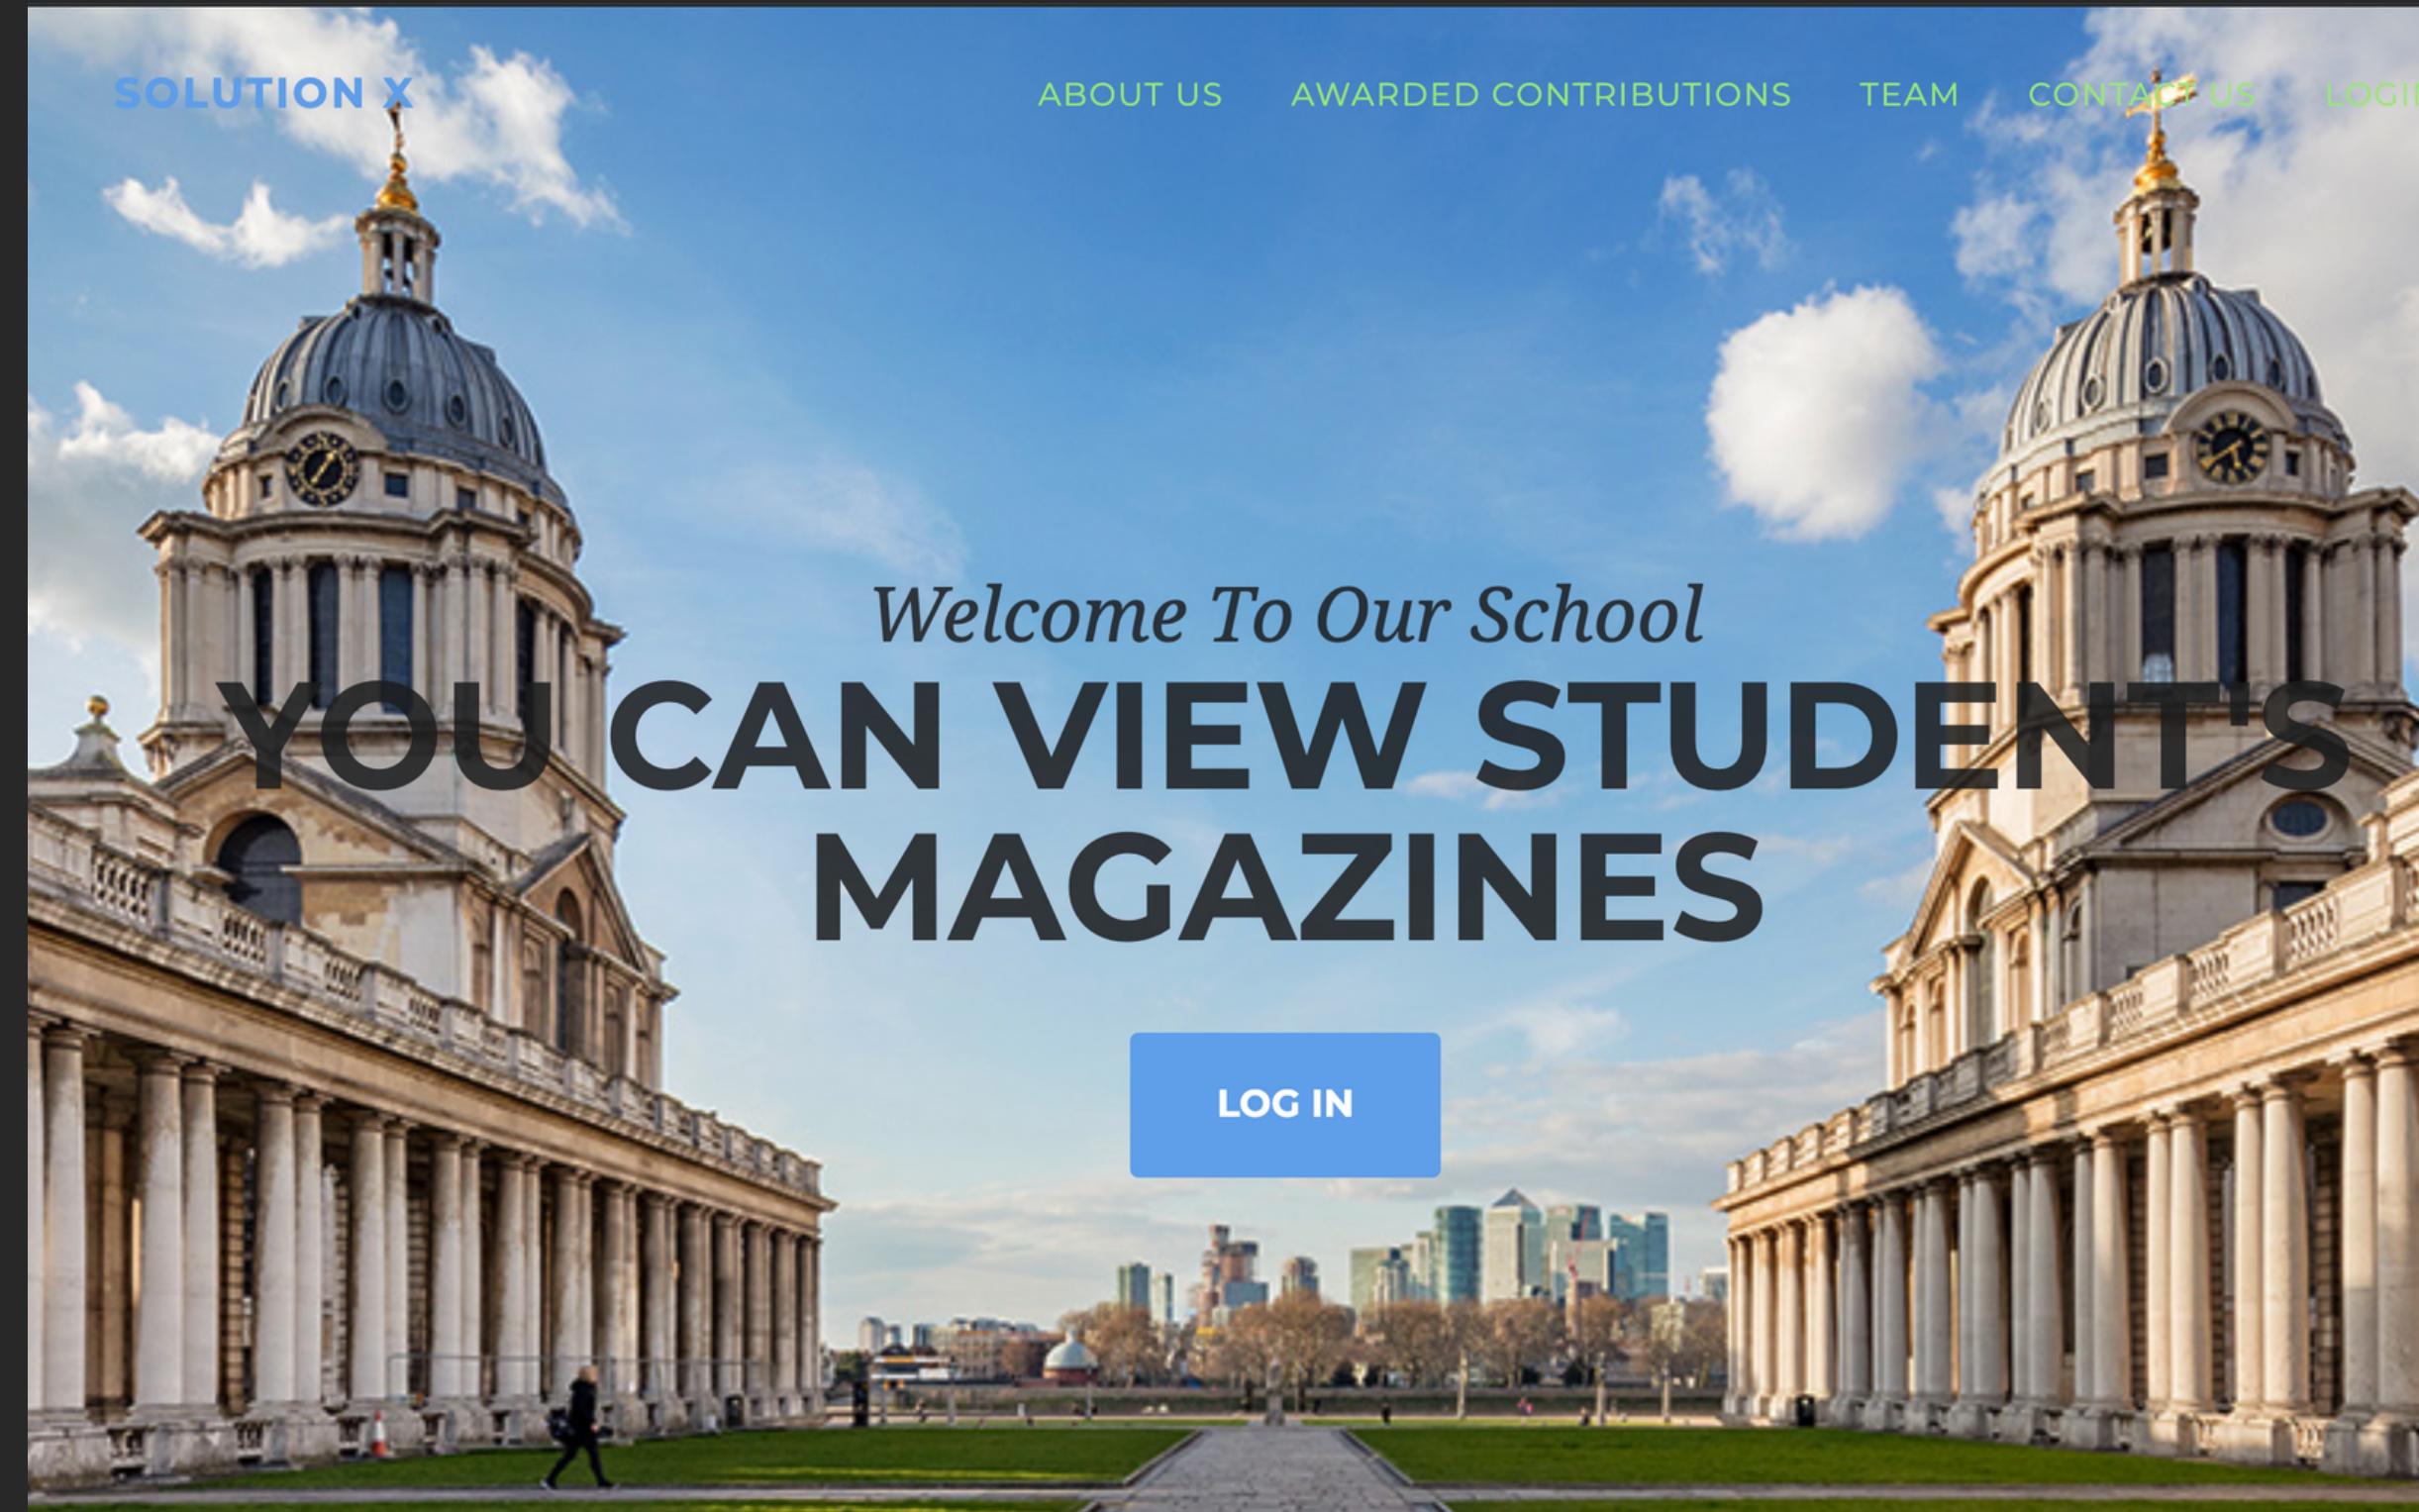

Faculties and Marketing Coordinators who are accepting the contributions have limited time for when they can accept the contributions.

Hard to organize

With the contributions given on paper in standard way, Marketing Coordinators and Marketing Managers will have a difficult time organising the contributions

THE SOLUTION

Digitise your magazine issues and student contributions with the use of our web-based role-based system for collecting student contributions for university magazines.

Web-based

Our system is a web-based system ready to be hosted on many different hosting and web servers. Users can access our system anytime or anywhere as long as they have access to the internet and a web browser.

Role-based

Our system provides role-based access control (RBAC) for different users with different roles. Both faculties and students as well as guest have full control over their roles in our system.

Centralised Contributions

With centralised database and a file system to store all the contributions, users are able to access every contributions with our system.

Web-based

Our system is built upon the latest web technologies and offers features such as these.

Ready To Use

Industry
standards security

Compatible with
any devices

Cloud Based

Accessible 24/7

High Performance

Role-Based

Our system offers a role-based access control (RBAC) with 5 different roles for users.

SYSTEM ADMIN

- System Admin can manage user accounts, academic years and faculties as well as the users inside those faculties.

MARKETING COORDINATOR

- Marketing Coordinator issues magazine issue titles and oversees the students and their contributions in their respective faculties.

STUDENT

- Students can view their faculties, magazine issue titles and submit their contributions to the issue titles.

GUEST

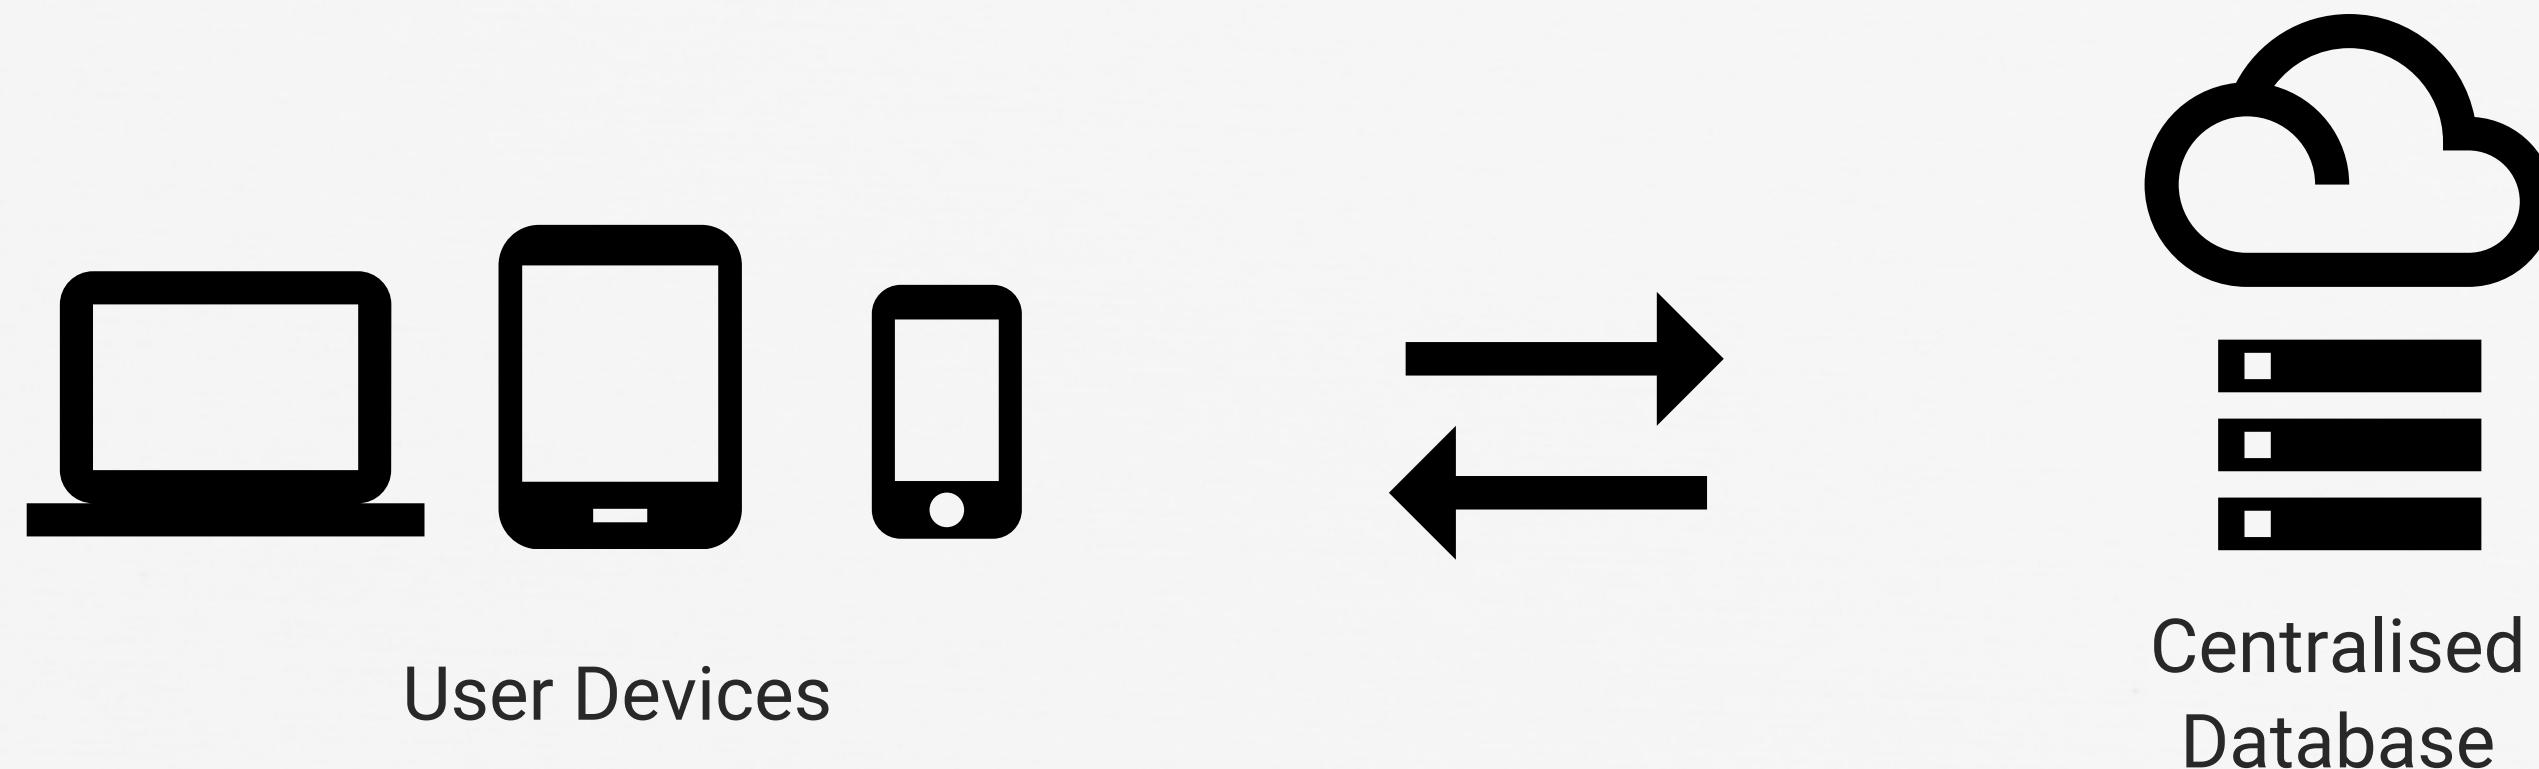

- Guests from faculties can also view the contributions selected for publishing.

MARKETING MANAGER

- Marketing Manager can oversee the contribution collection and submission process with reports and charts.

CENTRALISED CONTRIBUTIONS

The data uploaded to our system from various users of different faculties are stored in our centralised database for contributions. Users can view all their the contributions on our system easily.

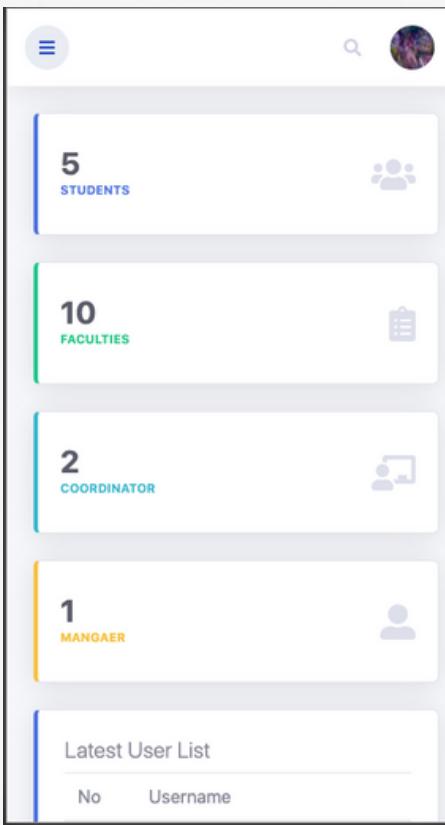

OUR MAIN FEATURES

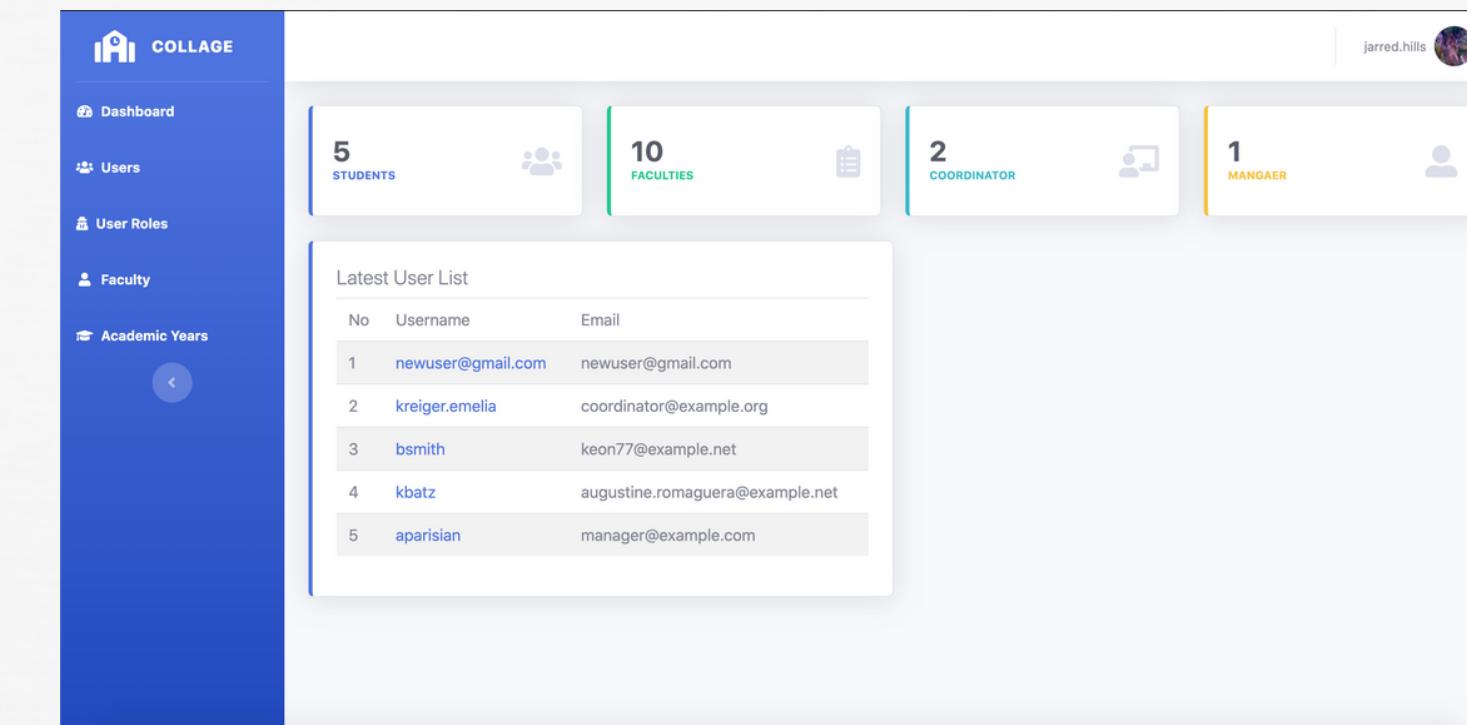

- Responsive on all devices
- Simple and Complete Dashboard
- Rich User Interface
- Practical Functions
- Detailed Reports

Responsive on all devices

Our system is highly responsive and can be used with any devices with a web browser

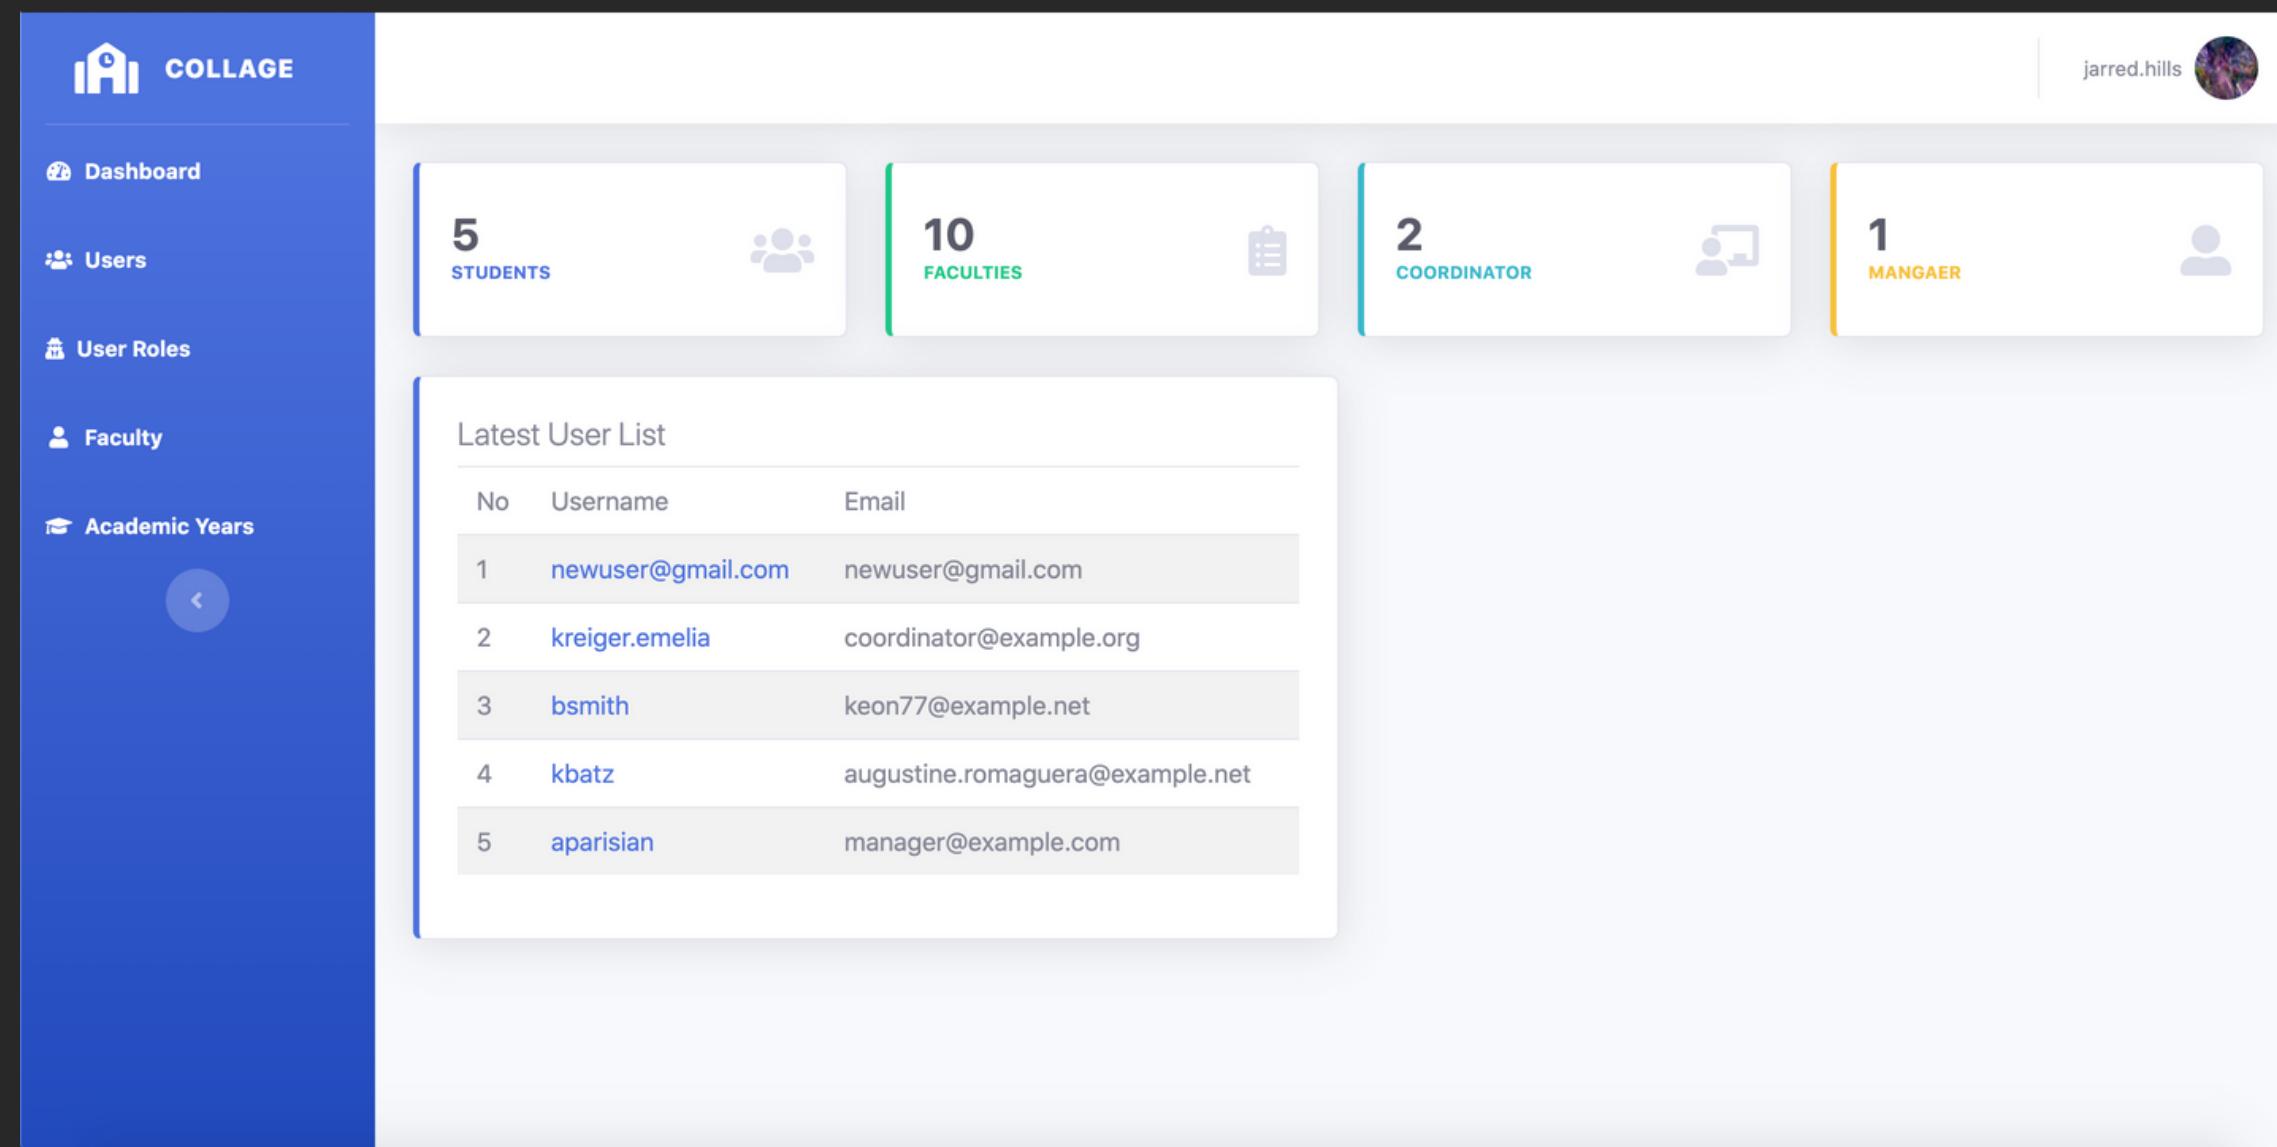

Mobile View of Admin
Dashboard

Desktop View of Admin
Dashboard

Simple and Complete Dashboard

Our Dashboards provide simple and complete information of the user data in the system. Here in the sample dashboard, users can see their data with simple and clean cards.

Rich User Interface

Our system interface provides users with a rich and engaging interface which is highly interactive, stylised and provider users with a easy to use flow.

The diagram illustrates a user interaction flow in a rich user interface:

- The user starts on the **Dashboard** screen, which displays two main sections: **ASSOCIATED FACULTIES** (containing 6 items) and **MAGAZINE ISSUES** (containing 6 items).
- The user clicks on the **ASSOCIATED FACULTIES** section, indicated by a large black arrow pointing right.
- This action leads to the **Your associated faculties** screen, a table listing six faculties with their details and a **See Issues** button for each.
- The user then clicks on the **See Issues** button for the **Faculty of Computer Science**, indicated by a large black arrow pointing down.
- This action leads to the **Magazine Issues of Faculty of Computer Science** screen, showing two issues with preview images and labels: **Issue 1** and **Issue 2**.

Example of our highly interactive interface

Practical Functions

Our system provide different user roles to have different practical functions of a magazine contribution collection system.

SYSTEM ADMIN

- Manage User accounts
- Manage Faculties
- Manage Academic Years
- Assign User Roles
- Assign User Faculties

MARKETING MANAGER

- View Magazine Issues
- View Contributions
- Download Selected Contributions
- View Users and Faculties
- View Reports

MARKETING COORDINATOR

- Manage Magazine Issues
- Publish/Reject Contributions
- Give comments on contributions
- View Users and contributions in Faculty

STUDENT

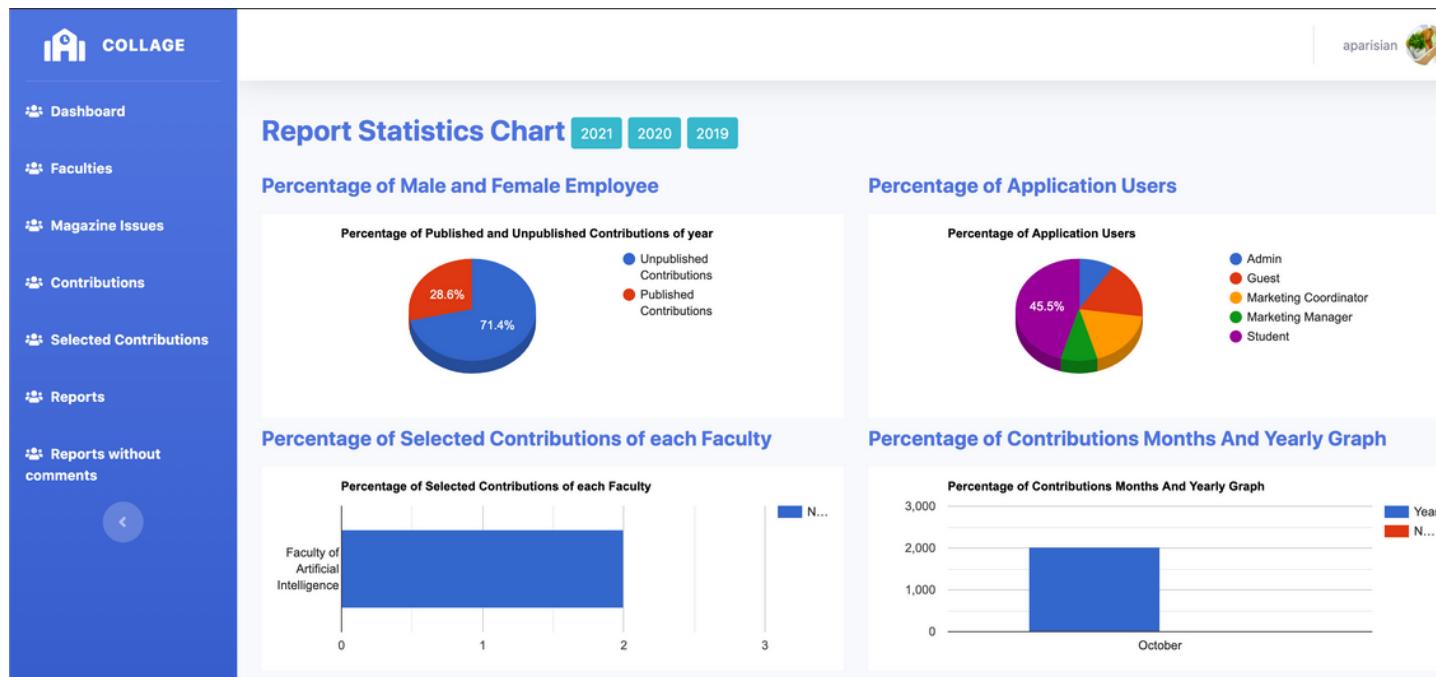

- View Magazine Issues
- Submit Contributions
- Give comments on contributions
- View Faculties

GUEST

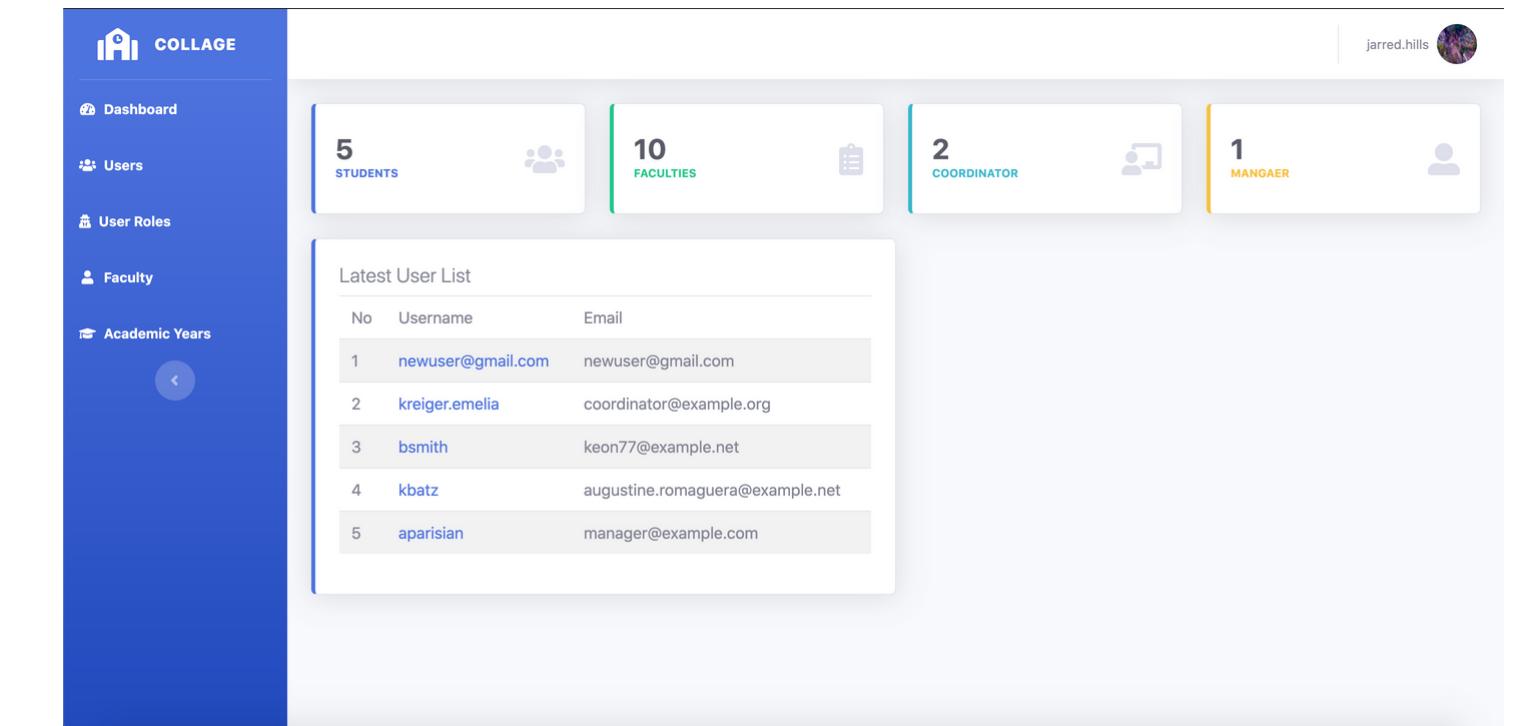

- View Selected Contributions of Faculty

Detailed Reports

Our detail reports and charts give insight and analytics on the data in the system.
